

Tighten up your game

Approach the tee with confidence

We would like to host a Titleist fitting day on **Saturday 8th December**, but we would need a few golfers that will be attending the day before to make all the arrangements for the event.

If you can volunteer, please [contact](#) the Pro Shop!

If you would like to try out the new Titleist TS 2 & 3 Driver and Fairway Woods, please contact the Pro Shop to give up your name. All of you will enjoy the event as there is a lot to learn about this new driver and different specs that you can change on the driver to help you to hit the ball more consistent and accurately.

New arrivals

Daily sport range

New Callaway Supersoft logo balls

Callaway 200 Laser review

The Callaway 200 is about 20% smaller than the 300 and will easily fit into your pocket if you need to take it with you on the move. It is also just under half the weight at just 110 g which makes this one of the lightest lasers on the market.

It comes in a royal blue plastic cover that has a rough surface on it to ensure you can get a good grip on it in all conditions.

Using the 200 couldn't be simpler as you just point at the target and push the black button. The 6 x magnification uses PAT or Pin Acquisition Technology to lock on to the flag up to 275 yards away with claimed accuracy of +/- 1 yard.

The eyepiece can be rotated to adjust the focus for those whose eyesight is less than 20/20. It also comes with a reasonably robust soft carry case that has a velcro closing top and a karabiner clip and back strap loop on the rear to fasten it to you bag.

We do have stock in store come and test it for yourself.

Tip of the week

Get connected - Ball between the arms drill

Creating a connection between the turn of your shoulders and swing of your arms promotes a more efficient golf swing with less moving parts. Most amateurs' swings have too many moving parts and as a result develop a great deal of inconsistency. To improve the connection in your swing I recommend The Ball Drill. Find a ball about the size of a slightly deflated volleyball and pinch the ball between both biceps while also having it make contact with your chest. Once the ball is in place, grip the club and begin to make short swings. Gradually work your way up to a full-length swing while swinging slowly. The key to performing the ball drill is that the ball must maintain contact with all three points while you are swinging. The length of your back swing may feel shorter and more restricted. Connecting the motion of the body and arms will eliminate unnecessary moving parts in your golf swing and make it easier to repeat.

The direction of technology

Materials open up your opportunity

Adjustable drivers, while being main-stream, have until now come along with some compromises, especially with forgiveness.

By using weight strategically, designers have been able to extend the size of the hitting zone.

The leading 2018 drivers not only protect ball speed away from the sweet spot, they protect the launch conditions.

That means, despite a slightly off-centre ball strike, you still get the length of ball flight and distance you expected.

Originally, the weight required for adjustable hosels reduced the amount of weight available to the club designer.

That's not the case anymore. More than enough weight is available to the designer to allow them to develop a driver packed with forgiveness.

Technology with real impact

Srixon Z 785 and Z 585 Drivers

The new Srixon Z 785 and Z 585 both come with real performance improvements.
We think these will make a big difference for many of our golfers.

[Here's why >](#)

What motivates you?

What are you most looking forward to, as you arrive?

We're trying to gain a better understanding of what's important to our golfers. Last week we had a simple question relating to social golf vs competitive golf. If you missed it and want to answer,

[Click here >](#)

This week we want to understand what you look forward to most as you drive to the golf club. Again a simple question. And again, to preserve privacy, your name is optional. So what inspires you?

Let us know

This is just one question. It might make you think though.

Let us know now.
