## The number one

### Step to more great shots

Your approach shot accuracy depends on you squaring the face to the target line.

You must have the right Lie angles for your golf swing.

The sole will be square to the turf at impact. You'll be straighter.

... ..

If the toe is up (vs. the heel), then your face will automatically point to the left (for right-handers). You're missing before you start.

If the heel is up (vs. the toe), then your face will automatically point to the right (for right-handers). Perfectly aligned, great swing, you're still missing right?

### We want you to hit more great shots

Let us help you hit more great shots. Let us check out your lie angles.  
Get that right, and you'll be amazed at how much more accurate you are.  
This applies to all golfers. Why waste a great swing?

## Which golf ball for your game?

### Chrome Soft

The most technology in any golf ball we carry.

### Supersoft

The lowest compression ball that's super long.

Both will give you a really great and soft feel off of all your club faces. Both have lower spin rates off the driver to help create an extra long performance. What will influence your decision will be your desire for spin and control around the green.

## Your wedge and ball flight

Shooting it in lower

If you watch golf on TV, you will have noticed that the best players have a low-to-mid trajectory on their wedge shots. They try and avoid the 'Hail Mary', hit-it-high and drop-it- dead shot, unless there's no other option.

If you watch the best golfers play this shot, you'll notice they seem to nip the turf (rather than carving out a divot), and they then seem to have a shorter follow-through.

When we see golfers trying to play this shot on the range, many move the ball back in their stance and play with a steeper angle of attack, under the impression that will create more spin. Actually a shallow angle of attack with clean contact creates more spin.

## **Come and learn to control ball flight**

Being able to shoot the ball in with a slightly lower trajectory and the spin to check the ball quickly, makes distance control so much easier.
