Give the gift of better golf!

The best holiday gifts you can wish for? I'm biased. An extra 30 yards off the tee; mid-irons you hit consistently straighter; a wedge that delivers one hop-and-stop; and a putter that's more magic wand.

If you miss out on those little surprises, then don't wait for next year. Either get here now and we'll wrap it for you, or get down as soon as possible in the new year. We deliver them all in the fullest sense.

The direction of technology

Materials open up your opportunity

Adjustable drivers, while being main-stream, have until now come along with some compromises, especially with forgiveness.

By using weight strategically, designers have been able to extend the size of the hitting zone.

The leading 2018 drivers not only protect ball speed away from the sweet spot, they protect the launch conditions.

That means, despite a slightly off-centre ball strike, you still get the length of ball flight and distance you expected.

Originally, the weight required for adjustable hosels reduced the amount of weight available to the club designer.

That's not the case anymore. More than enough weight is available to the designer to allow them to develop a driver packed with forgiveness.

The adjustable driver improvement

Now though, new manufacturing processes, new lighter but stronger materials, have provided the designers of adjustable drivers with enough discretionary weight to give you adjustability and forgiveness.

What motivates you?

What are you most looking forward to, as you arrive?

We're trying to gain a better understanding of what's important to our golfers. Last week we had a simple question relating to social golf vs competitive golf. If you missed it and want to answer,

This week we want to understand what you look forward to most as you drive to the golf club. Again a simple question. And again, to preserve privacy, your name is optional. So what inspires you?

Let us know

This is just one question. It might make you think though.

Let us know now.
