

Find the correct impact position

Most of you know that your position at address isn't the same as your position at impact. Most of you are probably pretty sure of the correct address position (although you should always have it checked). But not so many amateur golfers can show us the correct impact position. Setup's important, but so is finding the correct impact position.

Your fitting survey

The most difficult club

We'd like you to give us 3 minutes of your time to complete a survey that will allow us to provide you with a better and more personal service. With your individual responses, we get a much better idea of how we can help you. This is a win-win survey.

[Give us your answers now >](#)

The fairway wood reveals all flaws. Its combination of: shaft that's nearly as long as the driver shaft; a face not nearly as big as a driver face; and usually for use without the advantage of a "tee"; make this a very difficult to use club.

Technique, head design, and fitting can either make this a tremendous club to carry and use; or a club not worth its weight in the bag. Where are you when it comes to your fairway woods?

Fill in your survey

That's why we'd like you to complete this survey and let us know what's most important to you and your playing experience.

Make it a winner

The fairway wood can change your result on any hole: a great recovery club and a great club to set up an unexpected opportunity.

The Par 3 Advantage

Think your way around the Par 3s

What's your average score on the Par 3s? For most of the golfers we see, improved game management would lower that average. The target and club selection are critical parts of game management on Par 3s.

On this hole, if you're going for the target area in the center of the green, take a club which, if you strike it well, will get you to the very back of the green. None of us hit the ball perfectly on most shots. We all usually come up at least a little short.

Jack Nicklaus believed he could improve any golfer's scorecard by more than a few shots if he accompanied them on the round and selected the club and target on every shot. He would play the percentages NOT expecting a perfect shot every time.

Make Par 3 improvement a priority

That's an idea. If you and some friends would like to be accompanied on a round, then let's see how much better you score, if you let us help you with the percentages.
