A little pumpkin fun at RNGA

The pumpkins took one for the team...

... and they made for great target practice with our RNGA juniors!

What people are saying about us...

...We love to hear about your successes, so please don't forget to let us know.

"My son and I got fit for clubs with Ben at Rob Noel Golf Academy. My son did irons and woods and I did woods. The experience was just as memorable and successful as the one I did with Ben years ago. Ben dialed in the right shaft and head combinations for both of us. My son's distance control with his irons improved 100% and his confidence skyrocketed. As for me, I'm hitting between one and three less clubs into holes with my new woods. Thanks, Ben!" ~ **Chris Dupassage**

Questions? >

The number one

Step to more great shots

Your approach shot accuracy depends on you squaring the face to the target line.

You must have the right Lie angles for your golf swing.

The sole will be square to the turf at impact. You'll be straighter.

Lie angle too upright

If the toe is up (vs. the heel), then your face will automatically point to the left (for right-handers). You're missing before you start.

Lie angle too flat

If the heel is up (vs. the toe), then your face will automatically point to the right (for right-handers). Perfectly aligned, great swing, you're still missing right?

We want you to hit more great shots

Let us help you hit more great shots. Let us check out your lie angles. Get that right, and you'll be amazed at how much more accurate you are.

This applies to all golfers. Why waste a great swing?

Which golf ball for your game?

Chrome Soft

The most technology in any golf ball we carry.

Supersoft

The lowest compression ball that's super long.

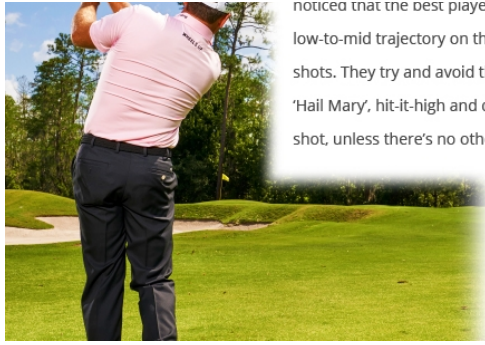

Both will give you a really great and soft feel off of all your club faces. Both have lower spin rates off the driver to help create an extra long performance. What will influence your decision will be your desire for spin and control around the green.

Your wedge and ball flight

Shooting it in lower

noticed that the best players have a low-to-mid trajectory on their wedge shots. They try and avoid the 'Hail Mary', hit-it-high and drop-it- dead shot, unless there's no other option.

If you watch the best golfers play this shot, you'll notice they seem to nip the turf (rather than carving out a divot), and they then seem to have a shorter follow-through.

When we see golfers trying to play this shot on the range, many move the ball back in their stance to try and get more of a full swing, which is not the best technique for this shot.
