

The big idea in 2019

Restoring your youth

Did you know that Jack Nicklaus played with counter-balanced golf clubs in his prime? He wanted to use every benefit technology could offer him.

Counter-balanced golf clubs help you swing the clubhead faster through the impact zone to generate faster ball speed and more distance. The big deal for most of us with counter-balanced golf clubs is that you swing faster with no more effort.

Ongoing improvements in materials and manufacturing processes are also allowing some of the premium brands to design and produce lighter clubs. Even some of the monsters on Tour have tuned into the opportunity this creates for extra speed.

"Lighter clubs mean that, despite advancing years, you can swing the club faster, generating more ball speed than ever. There's an added benefit. The club is easier to control. You will notice more consistency."

Your greatest game is ahead of you

These improvements mean that your best golf is probably ahead of you. Quieten your skepticism and

The Par 3 Advantage

Tee up the ball

It's an advantage to be able to tee up the ball, even if you're using an iron. It's the opportunity to create the perfect lie, but this is what we see too often.

This ball is teed up too high for an iron shot. This risks the ball hitting high on the face of an iron. There's a real loss of distance above the sweet spot on an iron.

Below is a perfect example. The ball appears to be resting on the top of the blades of grass. Don't try and play the ball on the up. It's an approach shot from a perfect lie.

Find time to practice and make sure you're playing the shot with the correct technique. Build your confidence.

Make Par 3 improvement a priority

Good technique and some practice breeds confidence. Good technique, practice, and confidence lower your scores. It also thrills you with better approach shots. We can help.
