Please do remember to follow the rules when using the alliance: -

- Bookings are subject to availability and can only be made one week in advance for games Monday to Friday and Sunday.
- Bookings for Saturday afternoons can only be made the day before.
- Saturday mornings are excluded from the arrangement.

Product of the Week - Cleveland Frontline Putters

Speed Optimized Face Technology—SOFT—is how we fixed the distance problem. You know, like when you're sure you've hit a 6-foot putt, but the ball stops short at 5?

Turns out, that comes from miss-hits. By moving the centre of gravity to the front of the putter and having SOFT, a groove pattern on Frontline's forged aluminium face, speed is added on off-centre strikes. So hit it off the middle or... don't. You'll still get the same distance and therefore hole more putts.

You've come this far, now
get closer

The new **CLEVELAND CBX 2 WEDGE**

Crisp contact each time

When you're within 100 metres, you want to get your ball as close to the flag as possible. A more forgiving wedge makes it easier to do that.

Cleveland's new CBX 2 is that more forgiving wedge.

The CBX 2 will get you there.

Trust your wedge

Most amateur golfers hit the ball near the toe. They know what it's like to see their ball fall short and right of the green. But with a sweet spot that extends to the toe, the CBX 2 makes it easier for you to trust your club.

Stick it to the flag.

At the end of a round, take your wedges to the practice green and check your shot dispersion.

Sizing up the sweet spot

A bigger sweet spot gives you better distance control because it makes the club more forgiving, making you more consistent. A heavy weight placed in the toe of the CBX 2 Wedge increases its MOI and perimeter weighting for extra forgiveness.

Let's go greenside and get you closer to the flag

If you want to have more fun around the greens improving your wedge play is key. Let's get out on the course together and help you do both.

Fix par 3 mistakes

COMING UP SHORT

Many golfers fall short of par 3 greens because they select a club based on a perfect shot. But perfect shots are rare.

No more EGO.
No more UNDER CLUBBING.

What matters more; hitting a good spot on the green or the number club you took to hit it?

Know your NUMBERS

There are four distances you should consider on each par 3. The distance to the front edge, back edge and middle of the green, and how far you hit each club in your bag.

Knowing these numbers and considering the size of the green makes it easier to select the best club for the shot.

Don't FORCE IT

Never hit a hard number to reach the front edge of the green. Because if you don't get all of it, you will land short. If a perfect strike with a specific club gets you to the back edge of the green, that's a better option. Your swing should stay more or less consistent. It's the club that really adds or reduces the required distance.

Do you know your numbers?

Next time you're on the range take ten shots with the same club at the same target and note your average distance and dispersion.

Better course management

Swing improvement takes time, but good strategy brings immediate results. We'll help you r the golf course that will put y tions.
