# What are you buying?

*Ignore the hype. Experience*  
***the moment.***

There is something exquisite about finding the sweet spot with an iron.  
Everything feels so perfect in that moment.

---

*Achieving that moment requires, returning the clubface square to the target with the sole square to the turf. That's very difficult if the lie angle / shaft length combination is wrong for you.*

---

**Get fitted:  
Make more moments**

Over 80% of golfers play with equipment that makes it more difficult to experience the perfect iron shot. You can change your experience. You can make more magic.

### You can do this

Let's get your irons checked. Let's help you make sure you have a setup that makes it easier to create more magical moments. Come and see us.

## Consistently better

*'The hands'*  
is not the right answer

From the top, which part of your body initiates the downswing? Many get into a good position at the top, but then allow the downswing to start with their arms or even hands.

*This is a good position.*

*A downswing started  
with the arms.*

You want accuracy and consistency of ball strike with approach shots. That is much, much easier to achieve if the large muscles control your first movement back to the ball.

### **Easy to say, harder to do**

Male golfers especially are conditioned to try and hit the ball with their arms and hands. I want all of you to take an #8 iron, get out on the range, hit balls, and to try and quieten your arms and hands. Try consciously hitting the ball with your “body” rotation. Notice how much more solid you can strike the ball. Practise this.
