## It's Thanksgiving!

With Black Friday right behind...

# BLACK FRIDAY

So, there are a couple “shop” things that I’d like to mention for this holiday.

**We’re offering these specials to our loyal customers:**

**For Friday ONLY**, we’re offering **15% off** the entire store except for golf balls and gloves and **50% off** our fitting fees.

Please give us a call or drop by to begin to get your favorite golfer some great deals!

## Thankful for...

**You know who is thankful for Titleist SM8 wedges?**

**Tyler Duncan** earned his first PGA Tour win with those new Vokey SM8 Wedges in the bag last week!

These will be available soon for fitting in the store!

We're thankful for free personalization of the entire Titleist golf ball line.

**Until December 31st**, you can stock up on all your favorite models.

Come order your stock of **ProV1s** now!

**Last but not least, we're thankful for you**

Without you, there would be no "us." And we are mindful of that in everything we do. Please enjoy your holiday and we'll see you on Friday!

**Happy Thanksgiving!**

We hope your day is filled with good food, good friends, and a loving family.

**The gifts we offer you**

Your driver is your most powerful club, yet many amateurs are happy just hitting the fairway. When it's set up properly FOR YOU, it gives you the confidence to get as far down the fairway as possible. That's exciting!

### SHAFT WEIGHT MATTERS

While shaft flex is talked about often, shaft weight arguably has a bigger impact on your ability to keep your swing on plane. And a swing that is consistently on plane is going to hit nearer the sweet spot more often.

*Some golfers may find a heavier shaft easier to keep on plane and swing faster than a lighter shaft, and vice versa, it all depends on your swing.*

### NOT SO SIMPLE

Finding the right fit is not simply a case of faster swings needing stiff shafts and slower swings needing flexible shafts.

### Let us give you the gift of more exciting golf

The right shaft weight increases clubhead speed, ball speed, distance, and accuracy. But we need to find the right one for you.
