A winter treat!

When winter comes whirling in, we usually take cover under heavy jackets, woolly jerseys and duvets. The biggest challenge each morning is put one toe out of bed onto the freezing tile floor!

But winter can be fun, and warm, and snug. You just need the right people and the right setting!

Before winter properly sets in, make way for our Winter Special! This includes a bed & breakfast and a complimentary glass of red wine or Gluhwein. Relax after dinner with a hot cup of coffee in the one hand and dessert in the other.

To book your winter retreat, call us on **051 871 4200** or

Simplify your short game

A wedge chart helps

You want to hit closer wedge shots more often with greater ease. If you can control your distance, you create more opportunities for birdies and par saves. Let's help you achieve this by simplifying your short game with the use of a wedge chart.

Wedge	Swing length	Yardage
60°	9 - 3	23m
60°	11 - 1	64m
60°	Full	92m
55°	9 - 3	32m
55°	11 - 1	98m
55°	Full	108m
50°	9 - 3	40m
50°	11 - 1	110m
50°	Full	122m
PW	9 - 3	43m
PW	11 - 1	118m
PW	Full	130m

A 'wedge chart' is an accurate recording of the distance each wedge travels depending on the length of your swing. Wedge charts are used by the majority of Tour Pros, yet no one really encourages amateur or club golfers to use them.

Making your wedge game easier

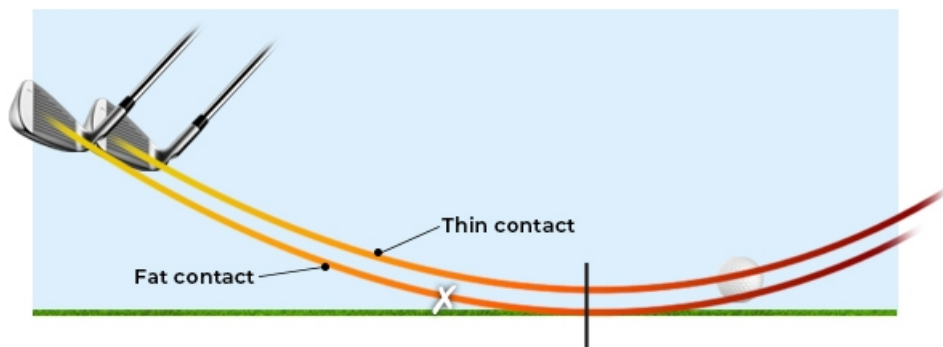

Understanding the importance of precision on approach shots using a wedge chart is your first lesson to a better short game and becoming a wedge guru. You may think you are not good enough for a wedge chart, but they really work for any level of golfer.

Better ball striking

[Contact us >](#)

There's a special feeling that comes with hitting a solid iron shot. Especially one you feel launch off the face and then track on a great trajectory going straight at the target.

Most of those who are struggling to hit solid iron shots have a low point of their swing BEFORE the ball. That means they either make "fat" contact (turf before ball) or they catch the ball with the bottom of their iron face (thin) on the upswing.

If you're a good ball striker and want to get even better, then try focusing on tempo. Reduce your emphasis on how far you hit your irons, and work on a consistent tempo. A good tempo will lead to consistent contact and consistent distances.

You need to strike the ball on a descending trajectory. That ensures your contact is solid. We have drills that can help you on the practice range. We can also look at your swing and let you know how to improve your ball striking. To ensure this, please email me at trevor.kitching@retailtribe.co.za to your contacts.
