May you be one with the course this winter

Winter Lessons

It's hard to believe that our event's season has come to an end. However, this doesn't mean that it is time to hang up the clubs. The weather seems

promising, and it's the best time of the year to fully invest in improving your game.

Let's get ready to take on the 2020 season!

Many of our students have benefited from their lessons this year, and have made massive improvements to their game. We can also help you develop into a better golfer with our offseason program, which starts right now and is running until **March 31st 2020**.

Get unlimited lessons for only **\$700**.

Juniors receive a special offer for **\$600!**

This program focuses on all aspects of your game which includes full swing, short game, putting, bunker play, on course, and much more. So don't hang up your sticks, just yet. Sign-up for the program and we can help you hit the ground running in 2020. Our packages are available with all of our Golf Professionals.

You never know, you might be included in this list next season.

Winter Range Plans

We have moved to the time of the year that our zoysia grass range tee is going dormant. We will continue to use it for the next couple weeks, but eventually we will move to the mats. As we move into the Spring we will be stripping the zoysia grass off the tee and releveling the tee. After we level the tee we will put zoysia sod down and will have more healthy and level grass to hit off of for the 2020 season.

We ask that you please **hit all shots from the mats** when we do move the balls to the mat area.

Fitting for approach shot magic

Three dimensions for a
BETTER APPROACH

We want you to evolve your thinking about your approach shots. Get more demanding about the results you want. Work with us on improving your performance.

Let's start with what you should demand from the partnership that is your swing and your irons.

DISTANCE:

Adding distance means you're playing a shorter club. That means literally a shorter length club. That makes it easier to square the club face and launch the ball high and with accuracy.

ACCURACY:

Squaring the face to target and squaring the sole to the ground at impact means you'll hit more shots tighter to the target. Technique is important. Fitting is imperative. Yes, fitting is imperative to accuracy.

STOPPING POWER:

Once your approach hits the green you want stopping power. That requires spin and an angle of descent that means the ball will sit. So, you want technology in your iron that launches your ball on a great trajectory.

Now improve your approach

Book an assessment with us now. Let us look at your swing and technique;
 your iron. **Enjoy the experience** as three

Enjoy the experience

Are your clubs in

THE CLOSET? 🤪

Many of our golfers have gone south to homes in places where the winter encourages golf. If that's you, then enjoy yourself. Make the most of it.

If you've now "retired" for the winter, then we'd like you to think back to the golf season past. What gave you the most enjoyment?

The social experience and friendships made and strengthened.

Competitions won.

The pleasure of the game, and those exceptional moments where a shot comes off.

The challenge of the game. The fact that there's always a skill to master.

Participating in an outdoor activity that helps with health and well-being.

Just being outdoors in beautiful nature.

The improvement journey. The personal challenge and the struggle to be a better golfer.

challenge and the steps to being a better golfer.

A new record low score.
