

## What do you want out of your game?

If you watched the last day of the PGA Championship, you would have seen more excitement than anyone expected. Congratulations to **Brooks Koepka**. It was a tough week for most of the participants, but he's tougher than most.

It's always a debate with golf. Should it be such an overwhelming challenge as we saw at Bethpage, or should it be a game that offers more reward and enjoyment more often?

There's never going to be a "right" answer for everyone. But there doesn't have to be. You play the game the way you want to. You take on the challenges you want to. You get out of golf, what you want to get out of it. Remember that.

## Get properly fitted

### Get a better experience on the golf course!

It's sure been an unpredictable spring so far. One day it's 75 and sunny and the next it's 31 and snowing. However, this year more than ever we sense that many of you want to improve your golf game. With improvement in mind, we'd like to address two areas that can make a big difference in your

scores this year:

1. Properly fitted equipment
2. Competition

### **Properly fitted equipment:**

Can you imagine running a marathon in shoes that are two sizes too big or too small? I can't actually imagine running a marathon at all, but I'm fully aware that if my shoes didn't fit, both my performance and my feet would suffer.

I believe it makes more sense for your equipment to fit you and your swing than for you to make swing adjustments that fit your equipment. Many of the players I work with want to get better, and many times it's not their mechanics causing under-performance—it's the ill-fitting equipment they use. Both Nate and I believe this strongly enough that we purchased **FlightScope**, so the people we coach and fit will have access to perfect information.

If you aren't familiar with FlightScope, [click here](#) and read up on the newest and most accurate technology available.

Here's the process we utilize to ensure the equipment you purchase from us is exactly what you need to improve:

#### **1. The Interview**

Questions help us to identify your ball-flight tendencies, equipment specifications, likes and dislikes about your current set, and your needs and preferences for new equipment. The dialogue will continue throughout the

fitting to ensure that your expectations are being met every step of the way.

## **2. Static Fitting**

After the interview, we determine your initial club specifications based on your preferences, needs, and ability. For drivers, fairways, and hybrids, we'll discuss the general performance characteristics of different models, lofts, and shafts. For an iron fitting, your height and wrist-to-floor measurement are taken to help calculate your static lie angle and shaft length, and your hand dimensions are used to calculate your static grip size.

## **3. Dynamic Swing Test**

For an iron fitting, you will hit a few golf balls from an impact board with special tape on the sole of the club. When the club hits the board, it will leave a mark on the tape that helps the fitter better understand how your setup, posture, and swing affect the clubhead's position at impact. We'll then make adjustments to arrive at your lie angle.

For drivers, fairway woods, and hybrids, face tape or spray is applied to the face, and the impact marks are analyzed for consistency to determine the optimal shaft length.

## **4. Ball-Flight Analysis**

Once the first three steps are completed, we put you on the FlightScope to ensure the fit is accurate and your chances of improved performance are maximized.

## **Competition:**

The second step to maximizing your improvement is putting yourself in more competitive endeavors. Tournaments, outings, and leagues are a great way to gauge if you're performing better. All three of our facilities offer leagues that are great chances for you to compete, meet new players, and get out of your comfort zone. I strongly suggest to all of my clients that they regularly compete if they want to improve.

Where can we help you?

**2019 Irv Warren Tuesday  
Night League**

**Format:** 2 Person Best Ball

**Teams:** 2 Person Teams

**Cost:** \$125.00 Includes Software and Prize Money Fees

**Handicap:** You will be playing with a full handicap that our software generates and updates week to week. Your handicap will be established after **week 3** and be updated weekly after.

**Schedule:** This league will be held on **Tuesdays starting at 5:30pm** and it will be a shotgun off the front or back 9. *If you know ahead of time that you will be gone, please let us at us know so we can adjust accordingly and help with finding a sub if needed.*

We are limiting the league to the **first 24 teams** signed up and paid.

**League dates:**

May 28th

June 4th, 11th, 18th, and 25th

July 9th, 23rd, and 30th

August 6th, 13th, and 20th

Please Call Irv Warren at **319-234-9271** or email us at

[info@golfwaterloo.com](mailto:info@golfwaterloo.com)

to sign up or if you have any questions!

**Katoski Memorial**

## Golf Tournament at Irv Warren Memorial Golf Course

### First Round Saturday, May 25th

Tee times 7:00 - 10:00am play in your own group for 1st round

### Final Round Sunday, May 26th

Tee times 7:00 - 10:00am assigned by your place in flighting

**Entry Fee:** \$40.00 + green fee and cart

**Entry Fee:** \$70 if you chooses to play in 2 divisions

*Optional Cash Skin Game*

**\$500.00** added flight money

### Divisions:

Open - Yellow tees

Senior 50 - 59 - Yellow tees

Super Senior 60+ - White tees

Ladies - Red tees

Flighting Party after completion of play on Saturday.

Free food, 2 for 1 drinks and day 1 skin pay-outs.

Sign up at Irv Warren **319-234-9271**

## Tommy Burns Memorial

### Golf Tournament

**Saturday, June 8th**

1:00pm Shotgun

## Tommy Burns Memorial Golf Tournament

- Saturday June 8th - 1:00 Shotgun start
- Irv Warren Memorial Golf Course
- 4 Person Best Shot
- \$70.00/per entry fee includes:  
Green Fee, cart use, flight prizes  
Meal following play at Majestic Moon  
\*\*Smoked food by Spivey\*\*

### Tommy Burns Scholarship Established 2017

Tommy Burns was a lifelong advocate for education. While he struggled with school early in his life, he understood the importance and impact of education. He strongly (or some would say relentlessly) encouraged his sister Karen to pursue her college degree. As a non-traditional student, after years of working in construction, he found a renewed interest and passion for his own education and completed a CNC training program at Hawkeye Community College. When his career as a CNC operator was cut short due to layoffs, he again started looking for new ways to direct his passion for learning to find a new career path. Just before his unexpected passing, Tommy was preparing for a training process to enter the field of corrections with the Black Hawk County jail.

Tommy Burns loved his son, his family and his friends with his whole heart. In the words of his sister Karen on behalf of his family, "We want his name carried forward to help another parent or future parent give their kids everything life has to offer. That's just the kind of man he was. He loved being an uncle to his nieces and nephews, and above all else, he loved being a dad to his son, Luke." He was an avid outdoorsman who enjoyed hunting, fishing, gardening, and spending time with his pets. Tommy died from complications after surgery on October 29, 2016.

In his memory, his family established the Tommy Burns Scholarship which is awarded to full-time students pursuing a degree in police science and sustainable construction and design and who graduated from the Waterloo Community School District.

## After golf...

No excuse not to stop at the 19th hole!

**BUY ONE  
GET ONE  
FREE!**

After the completion of your round of golf at Irv Warren, Gates Park or South Hills you can enjoy **Buy 1 Get One Free** drinks or **\$5.00 off** a pitcher of beer.

We have recently added new T.Vs and a top notch sound system to all facilities so you won't miss out on any televised sporting events.

## Everyone wants forgiveness

### And you want it all ways

If your handicap is over 18, then there's a good chance that you either don't get great height on your approach shots, and/or often lose the ball to a fade or slice. There's technology to help: Super Game Improvement!

---

#### Large profile

You'll notice that these clubs are quite thick. That moves the CoG deeper (further from the face) and lower. The launch angle of the ball will be much higher for better ball flight. The large face provides a huge hitting zone.

---

---

#### Wherever on the face

There's going to be technology that protects ball speed heel/toe, and high/low. As much of the face as possible will spring right up to the legal limits.

---

---

#### **Offset to cure a slice**

The offset will not only help to move the CoG deeper, but it also gives you more time to square the face at impact.

That will reduce or even remove your slice.

---

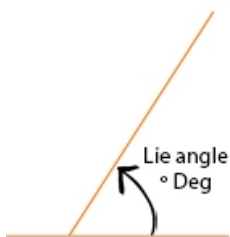

---

#### **Stronger lofts**

The higher launch angle allows the designer to strengthen the loft to create added distance.

Shorter irons on approach make ball striking easier.

---

*Too many of our inexperienced and higher handicap golfers miss out on the fitting process. They don't think they're skilled enough. Where's the logic? "I'm not that good so I'll play with an iron that makes the game harder!" Get fitted. Make the game easier.*

## **Changing shapes**

Super game improvement irons used to look like mini metal woods. No longer. Materials, manufacturing and smart design deliver technical assistance in good-looking models. Talk to us. Let us show you. Oh, and let us FIT you.

# Ten shots better

## Worthwhile practice that pays back

How easy should a chip shot be? What should you be averaging to hole out from within 10 yards of the green playing a chip shot?

*How many times out of 10, do you take 2 and how many times is it 3 shots? Are you as good as you would be with a putter in hand?*

A very common fault we see with less experienced golfers, is an attempt to “flick” at the ball on chip shots. Too much wrist action ends up with too many shots thinned, and certainly very inconsistent contact. If you’re not really in control of this shot, then come and learn the correct technique.

Then practice using some simple aids – as shown here – and set out to gain control over where your ball lands and how much it rolls. Watch Martin Hall show you a neat practice station to perfect your technique.

[Watch now >](#)

## The ten-shot assessment

The right technique on just four shorter golf shots, can save most golfers 10 shots and more in a round. For many that’s a single figure handicap. For all, it’s a round full of great saves, and more opportunities. Start with an assessment. Let’s discover how many shots we can improve your game by.
