Revealing the lie

The key to accuracy is flawed?

We suspect that you all realize that the lie angle on your irons is of paramount importance to your ability to hit solid and accurate approach shots.

You may even have read the research that reveals that for every 1° your lie angle is too flat or upright, you'll be 10 feet wide of the target with a perfectly hit #5 iron. So you'd appreciate why we're alarmed by some research we did ourselves. The standard lie angle for different brands is different!

Brand 1
#7 iron

 Lie angle 62.5°

Brand 2
#7 iron

 Lie angle 63°

Brand 3
#7 iron

 Lie angle 62°

That's right, the first three models we checked (all game improvement models) from three different brands, all had different standard lie angles! That means you might be standard with one model and 1° upright with another.

Every purchase needs a fitting

No one should buy golf equipment (any golf club) without a fitting. As this research shows, even for the most important component of an iron; the part that controls accuracy; it's critical to get fitted for your swing AND the model being selected. Make it easier to hit better golf shots.

A better life for them

You didn't grow up like this

Does the way children grow up today worry you? How radically different is their childhood and teens to that of just 20 years ago?

School seems
more intense.

At home, they're still
connected to everyone else.

Then it's off to play
computer games.

Children have to be digitally literate, but they also need to invest in movement and athletic ability, their health and well-being, and their interpersonal skills.

Let us add balance to their lives

Have your child enroll into one of our group sessions to learn to play golf, and we'll have them outdoors, interacting, learning new skills, and having a whole lot of fun they can take out onto the golf course. They won't stop playing computer games, but for a couple of hours each time we'll have them off the phone, out from in front of the screen, engaging in fun activity.
