What are you doing this weekend?

Join us for our KAABOO Music Festival

Please note our Driving Range and Surf's Up Cafe will be closed on the festival days.

**The Driving Range and Surf's Up Café will be
closed all day on:**

**FRIDAY SEPTEMBER 13
SATURDAY SEPTEMBER 14
SUNDAY SEPTEMBER 15**

For the KAABOO Music Festival

**We apologize for the inconvenience and the facility will
re-open on Monday September 16 at 8:00 am**

Pelly's Mini Golf will be open on the above dates.

**Experience one of the best
feelings in golf**

We sometimes wonder why so many golfers seem comfortable with their golf game as it is. Most golfers are 50 yards or more shorter than they should be off the tee; they play with inconsistent ball striking that makes approach shot play difficult, and their short games suffer from lack of technique. Performance is obviously not their #1 priority.

But every golfer we know gets real pleasure from the feeling of a perfectly struck golf shot. So why not search for the ability to enjoy that feeling more often? [Contact us.](#)

Spin: friend or foe?

How can you influence spin rates?

Manufacturers have long known that regular golfers needed a higher launch angle on tee shots. For a while, they tried to urge golfers to play super-high lofted drivers. But while increasing the dynamic launch angle (the actual angle the ball launches), it also created the side-effect of too much backspin for many.

If you create too much back spin for your ball speed on your tee shot then you create too much lift and the ball will balloon and then fall too quickly to the ground, robbing you of distance.

By fixing a very common swing fault, most golfers can increase the launch angle and lower spin rates to increase distance off the tee substantially.

Many golfers have a slight downward angle of attack on the ball with a driver, but that has the effect of lowering launch angle and increasing spin rate. A very poor scenario for most golfers.

Twenty-one extra yards

TrackMan data shows us that a golfer with an 80mph swing speed who changes their angle of attack from -5° to $+5^{\circ}$ increases their dynamic launch angle by 4° but even more importantly reduces their spin rate by over 1,000rpm. And that means twenty-one extra yards.

Don't let spin rob you

Book an assessment with us and let's find your personal launch DNA: the perfect match of launch and spin for the ball speed you're creating.

Fall in love with golf

MASTERING

a skill is great for

SELF-CONFIDENCE.

The boost, thrill, and growth we see in a child when they start to master a particular golf skill gives us tremendous fulfillment. As we start to see them fall in love with the game and find new connections with others on a similar journey, we know we're doing our job.

If we can do that, they'll be healthier, happier, and have a game and friends for a lifetime.

Sign your children up for one of our fun junior golf programs. We'll set them on the pathway to a lifelong love affair with the game.
