## To waggle or not to waggle

Matt Terzo, PGA Instructor at the Del Mar Golf Center shows why many tour professionals use a one piece takeaway "waggle" instead of a traditional waggle.

If we can help you with your game, please

## Let their ball wind up in the hole

If you know someone who's inexperienced or just starting the game, they'll often feel compelled to pick up before they finish the hole. Why deny them the fun of holing out for a score? Why not change it up a bit? Rather than them having to pick up, why not have them drop a ball and start from where they're likely to score a five or better? Then they'll enjoy the thrill of holing out, as well as the occasional really low score.

Golf is almost unlimited in the fun you can create.

## What are you buying?

*More than hope, you want*

***certainty.***

*There's already too much that is "random" in golf. You want a relationship with your irons that will add certainty.*

There's quite a large group of golfers who arrive at the club NOT knowing whether they'll shoot in the mid 90s or high 70s that day. The way they strike their iron shots can be so off one day and so perfect another.

### Get fitted: Add certainty

Does your golf swing require difficult-to-repeat compromises? Do your brain and body intuitively have to compensate for poorly fitted golf equipment? That's why Professionals desire a simple swing and fitted equipment. It adds certainty.

### Certainty adds enjoyment

Let's help you make sure you have a setup that makes it easier to add more certainty to your golf days ahead.

# Read the wind

## The misleading **SAYINGS**

"It's a one-club wind" is a very misleading statement. A golfer hitting a long iron in a particular wind might only experience a 20% reduction in distance, yet when they get down to the short irons, the impact in the same wind might be as high as 40%.

### **Improve your decision making**

Choose to get better at making good shot selection decisions and better club selection choices. As you play add to your "golf intelligence" by discovering the impact 10, 20, and 30mph winds have on the distances you hit clubs. Start with an accompanied play session with us.
