What are you buying?

It's NOT off the shelf

find your one.

Whether it's about improving a handicap, shooting low scores, winning competitions, enjoying great shots, or fulfillment from the game, **FITTING** is the **MUST HAVE**.

Golf equipment, especially an iron, is an assembly of the perfect parts for

you. Lie angle, length, flex, loft, weight, grip, means you can make sure your iron fits you.

Get fitted: Find your ONE

We'll keep telling you that you're one in a thousand. Yes. For each iron model, there are usually around 1,000 variations of build. One will deliver more confidence, more magical moments, and more consistency and certainty.

Let's find your ONE

The day you decide you want to improve your approach shots, remember you're not buying a new set of irons. You're buying so much more than that. You're buying something uniquely important to you.

[Read the wind](#)

We'd recommend
SIMPLER

You'll all have heard on TV the commentators talking about a top Professional playing a "stinger". A very low shot that will remain under the wind. This was a shot made famous by Tiger Woods.

If you want to learn how to play the 'stinger' then please [contact us](#) and invest the time into learning and then practicing the technique. Generally we would recommend that this is a shot for the better golfer.

For most golfers we talk to, we'd recommend a simpler approach

Take more club. An #8 iron in a 10mph head wind will probably need you to go up to a #6 iron. And then don't try and swing harder. But do commit to the shot.

Embrace the wind

The wind shouldn't spoil a round. It might well hurt a scorecard. But if you think of it as a challenge on the day that exercises your mind and game management, it will improve your thinking on every round.
