## Greetings from Paul and Steve

### Welcome to our latest newsletter

Spring has arrived and our new greens are flourishing. We will be opening them as soon as the greens are fully covered.

We are a family-oriented venue and we had the pleasure of hosting our resident Junior Medics graduation ceremony, after many weekly training sessions at Bluetree. Congratulations to the young medics!

## Golf News

### Loving and learning a lifetime sport

With a coaching facility that is second to none, our fully qualified PGA professionals are ready and waiting to help you play better golf. Golfers, and those interested in learning the game are encouraged to make use of our fantastic facility.

The Junior Holiday Clinic that is happening this week has been a major success, encompassing games, drills and practice sessions. Don't let your young one miss out. Our junior clinics happen every school holiday.

If your child's golfing is already at an advanced stage, why not enrol him/her in the Nomads Junior Golf Championship, which has just started. Finals will be on 7 September 2019. Lots of fun and prizes to be won including a prize giving luncheon.

# Spin: friend or foe?

## This impacts better players too

Last week we showed how many golfers have a simple swing fault that is robbing them of 21 metres. They strike their tee shots with a slightly descending blow (just 5°) rather than a slightly ascending blow.

One of the characteristics of better players is a better swing, but it's also often a faster swing speed. However, when we look at most of our better golfers, while they don't strike the ball on the tee with a descending blow, they're often "neutral", so even for them, the distance they're being robbed of is substantial.

Clubhead speed	Angle of attack	Launch angle	Spin rate	Total distance
100mph	0°	10°	2,600rpm	278 yards
100mph	5° up	12.5°	1,900rpm	293 yards

## Don't let spin rob you

Book an assessment with us and let's find your personal launch DNA: the perfect match of launch and spin for the ball speed you're creating.

# It's time to do something

## This is wrong, let's reverse the trend

Between 2002 and 2012, the incidence of type-2 diabetes in children increased by 5% according to research done for the Center for Disease Control and Prevention. Further research indicates that we can expect to see an even faster acceleration by 2022.

You might think that golf isn't a sport or activity that burns the most calories. You might think that there are more intense sports. But you'll struggle to find a sport that gives a child so much.

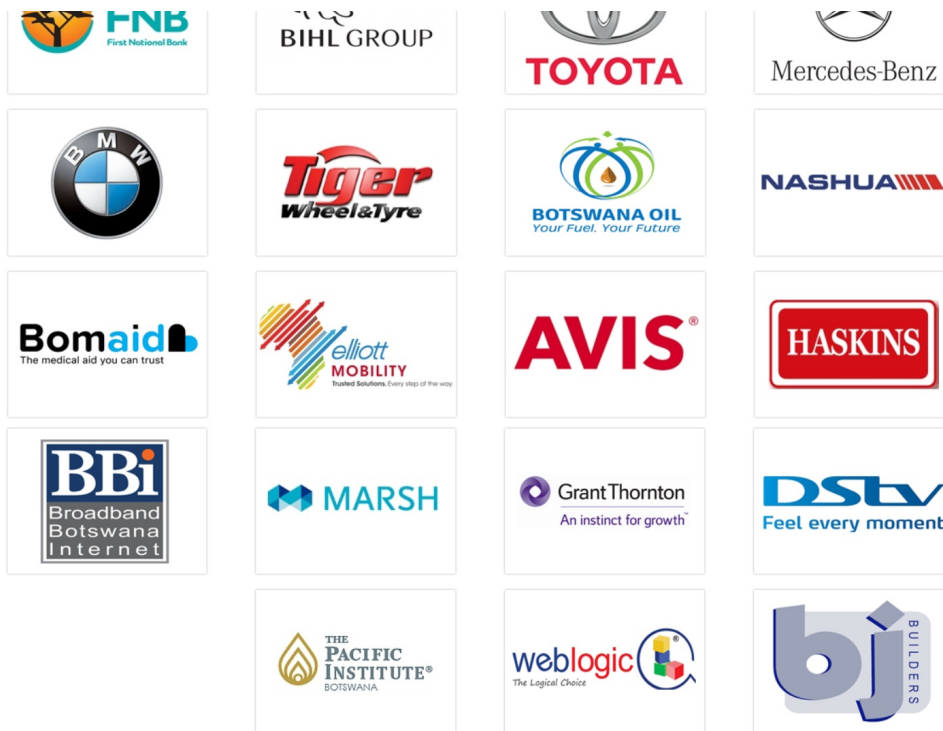

## We know golf is good for children

If you have a child or grandchild, then let's get them started playing golf.

We'll make it fun and enjoyable, social, and active. We want them to be healthier for their whole life. We want them to have those 5 years back. It's time to do something.
