Fitting for approach shot

Delivering a

BETTER APPROACH

When we fit you for new irons, we can add "distance" which means a shorter club. And using a club with a shorter shaft on approach shots leads to more accuracy.

Many club makers have identified 37 as an important point in shaft length.

Fall in love with golf

Above that length, the iron's performance starts to deteriorate rapidly. So allowing you to hit a 37" #7 iron rather than a 'longer'

#6 iron is a big deal.

THE CLUBFACE – METALWOOD OR IRON –

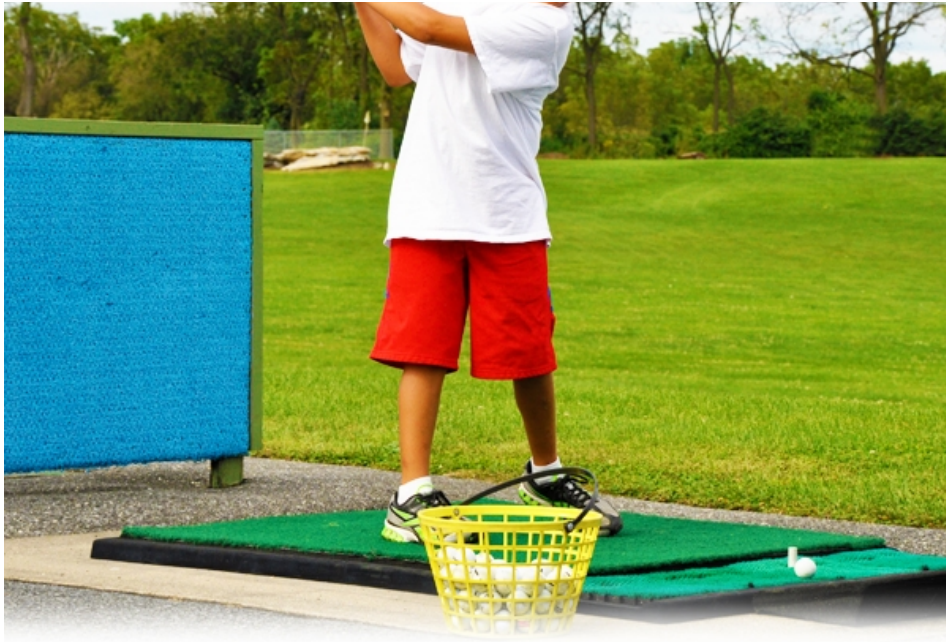

has been part of a materials and design revolution. New materials allow them to be thinner and faster. New internal design is supporting the next generation of irons to allow even more speed across more of the face.

Now improve your approach

Book an assessment with us now. Let us look at your swing and technique; your irons and how the technology helps you. Let us improve the number of magical moments you have on the course.

MASTERING a skill is great for **SELF-CONFIDENCE.**

The boost, thrill, and growth we see in a child when they start to master a particular golf skill gives us tremendous fulfillment. As we start to see them fall in love with the game and find new connections with others on a similar journey, we know we're doing our job.

If we can do that, they'll be healthier, happier, and have a game and friends for a lifetime.

Sign your children up for one of our fun junior golf programmes. We'll set them on the pathway to a lifelong love affair with the game.
