If you can't sink 'em

Join 'em!

This Saturday from 3-5pm

After going through the AimPoint Green Reading education, you will never again have to guess at how much a putt breaks. **Any putt!**

Learn that putting is predictable and discover the most effective and reliable ways to determine the direction and precise amount of break for any putt, all based on gravity.

To be a winner join us for our Aimpoint Read and Speed Clinics:

May 4th

3-5 pm

\$175 per person

A Better Plan to Play Your Best Golf...

We come across too many instances where golfers are not seeing the benefits of the modern equipment. In this day of technology, we are bombarded with data based on PGA Tour averages. The average PGA Tour player swings at 113 mph while the amateur male golfer generates 90 mph of club head speed on average.

At RNGA, we suggest using the LPGA data as a more accurate measurement for average male golfers clocking 100 mph club speed and lower. It is imperative that we match your load profile, loft, spin rate, and launch angle to your unique swing pattern. This can be done with a combination of proper club fitting and improved swing technique.

At the Rob Noel Golf Academy, we can do both! We can improve your swing technique and fit you with the proper tools to maximize your game, from putter to driver. Only teachers should be fitting your golf equipment.

Reserve your spot now and have your best Summer ever!

TRACKMAN GOLF		LPGA TOUR AVERAGES							trackman.com/golf
	Club Speed (mph)	Attack Angle (deg)	Ball Speed (mph)	Smash Factor	Launch Ang. (deg)	Spin Rate (rpm)	Max Height (yds)	Land Angle (deg)	Carry (yds)

Congratulations to all our RNGA juniors - well played!

Bored kids?

Never at RNGA

A promotional poster for Rob Noel Golf Academy's Summer Golf Camps 2019. The background is a lush green golf course with tall pine trees under a clear blue sky. At the top center is the academy's logo, which includes a small icon of a classical building and the text "ROB NOEL GOLF ACADEMY" with "Money Hill" written below it. A large, realistic white golf ball is positioned on the left side of the poster. The main title "Summer GOLF CAMPS 2019" is written in large, bold, green letters, with "2019" being the largest and set against a white brushstroke background. Below the title, the dates "June 18-21 or July 9-12" are listed, followed by the location "77141 Money Hill Parkway Abita Springs, Louisiana". To the right of the dates, the time "9:00 - 12:00 pm" and the age range "Ages 4-16" are specified. Further right, separated by a vertical line, is the price "\$275 per student". At the bottom of the poster, there are four small rectangular photos showing children participating in golf activities: a group standing together, a group sitting on the grass, a child swinging a club, and a group of children with their golf bags. Below these photos, a line of text provides contact information: "For more information please visit our website or call (985) 809-0060". The website address "www.robnoelgolfacademy.com" is printed in large, bold letters. In the bottom left corner, there is a small, faint URL "ProspertyMall.com".

Simplify your short game

A wedge chart helps

You want to hit closer wedge shots more often with greater ease. If you can control your distance, you create more opportunities for birdies and par saves. Let's help you achieve this by simplifying your short game with the use of a wedge chart.

Wedge	Swing length	Yardage
60°	9 - 3	23yrd
60°	11 - 1	64yrd
60°	Full	92yrd
55°	9 - 3	32yrd
55°	11 - 1	98yrd
55°	Full	108yrd
50°	9 - 3	40yrd
50°	11 - 1	110yrd
50°	Full	122yrd
PW	9 - 3	43yrd
PW	11 - 1	118yrd
PW	Full	130yrd

A 'wedge chart' is an accurate recording of the distance each wedge travels depending on the length of your swing. Wedge charts are used by the majority of Tour Pros, yet no one really encourages amateur or club golfers to use them.

Making your wedge game easier

Understanding the importance of precision on approach shots using a wedge chart is your first lesson to a better short game and becoming a wedge guru. You may think you are not good enough for a wedge chart,

but they really work for any level of golfer.

Ten shots better

Contact us >

Here's where

If you're in the 15-and-up handicap range, there's a strong likelihood you could improve and be 10 shots better. If you don't believe us, monitor your next round for shots lost in the following areas:

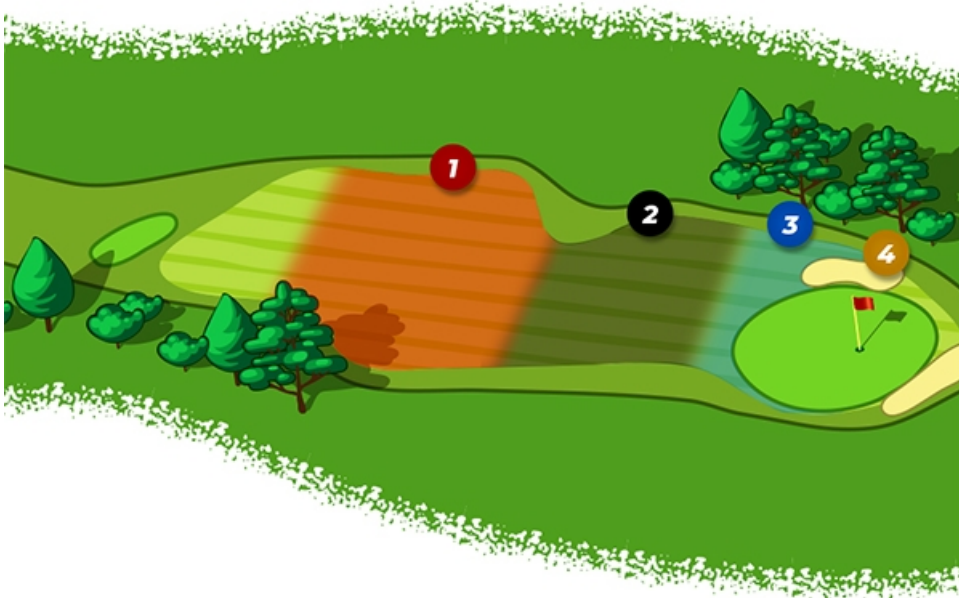

1

Consistency and distance control

From 100 yards in, too many golfers still take 4 shots. A lack of control of distance, wrong club choices (or lack of choices), and inconsistency as they attempt to use swing speed to control how far they hit the ball, mean it's a green missed.

2 *Fat and thin misery*

One of the most common golf shots golfers are left with as a final approach to the green, is the short-pitch shot (15 – 40 yards). Most don't understand the technique. Most don't make good contact. Most can't control landing spot and roll-out. Most know it's 3 from here (and possibly worse).

3 *The up-and-down hope*

It should be 2, or even 1, from here at least 50% of the time. You should be able to play this shot with confidence every time.

4

The sand horror

How many of you have no real confidence in the greenside sand? How many of you know it's at least 3 shots from here, even 4 sometimes, rather than the occasional 2?

The ten-shot assessment

Book a session with us and let's evaluate your technique and your equipment. Let's identify how many shots we can improve your game by.
