More power for Warren Lo

New AJS staff member **Warren Lo** who is an amateur golfer at Eastlake, playing off a 5 handicap, has never had a lesson before he joined the team. After a few short weeks he decided it was time to put some work in with the coaching staff, and now he has better posture allowing him to turn more efficiently. He has started adding width to his swing helping him generate more power.

Great work, Warren! A couple of lessons can make a big difference to your game. If you want a more powerful swing, or if you want to improve any other aspect of your game, please [contact us](#).

Play your best

With the best in the business

We have some exciting Fitting Days coming up in June / July. Come and try the latest ranges from Mizuno and PING and see how your game is taken to the next level. Find out more below.

Mizuno Golf | Tuesday 25th June

The Dark Art of Distance

The Mizuno ST190 combines every known factor to deliver ball speed and driving distance, aligned with their lowest ever spin rates. Mizuno is pulling out all the stops with this new range and you need to try it.

PING Fitting Day | Friday 12th July

Stop steering and start driving. Faster.

Movable-weight technology offers a simple way to customize your driver for a desired ball flight so you can swing fearlessly and hit a lot more fairways more often. Come and try out the latest range from PING and play better golf more consistently.

Both days are from **8am to 1pm** and bookings are essential.

Everyone wants forgiveness

And you want it all ways

If your handicap is over 18, then there's a good chance that you either don't get great height on your approach shots, and/or often lose the ball to a fade or slice. There's technology to help: Super Game Improvement!

Large profile

You'll notice that these clubs are quite thick. That moves the CoG deeper (further from the face) and lower. The launch angle of the ball will be much higher for better ball flight. The large face provides a huge hitting zone.

Wherever on the face

There's going to be technology that protects ball speed heel/toe, and high/low. As much of the face as possible will spring right up to the legal limits.

Offset to cure a slice

The offset will not only help to move the CoG deeper, but it also gives you more time to square the face at impact.

That will reduce or even remove your slice.

Stronger lofts

The higher launch angle allows the designer to strengthen the loft to create added distance.

Shorter irons on approach make ball striking easier.

Too many of our inexperienced and higher handicap golfers miss out on the fitting process. They don't think they're skilled enough. Where's the logic? "I'm not that good so I'll play with an iron that makes the game harder!" Get fitted. Make the game easier.

Changing shapes

Super game improvement irons used to look like mini metal woods. No longer. Materials, manufacturing and smart design deliver technical assistance in good-looking models. Talk to us. Let us show you. Oh, and let us FIT you.

Contact us >

Knock it down. Knock it close.

*Whether the wind is with you or against you, a **LOWER FLIGHTED SHOT** will be **LESS EXPOSED**.*

*Combine that with how much easier it is to nail your **DISTANCE TARGET** with a lower trajectory and you've got **POWERFUL MOTIVATIONS** to learn to play this shot.*

Played with the right technique and this shot spins a ton. The ball stops and even reverses. Setup and ball position at address are important. So is an angle of attack that is shallower than many of you have. You'll even see the very best slightly deloft the club at impact.

Choosing between a high 56° wedge shot or a knock down three-quarter 52° wedge approach; the best players will take the knock down every time.

Learn to play this shot

If you want to be more accurate from 100 metres in; setting up more birdies or a par-save; then most amateurs would benefit enormously if they could hit their wedge shots on a lower trajectory with more spin. Come on.

Be better. It's time to learn a new skill.
