Center of Gravity (CoG) matters

**To old & young, male & female, skilled &
inexperienced**

Whether you swing your driver particularly fast or very slow, the CoG location of your driver impacts significantly on your tee shot performance and playing experience.

Although the CoG location in different drivers might be a few mm apart (in depth and in height), it will have a significant impact on your launch angle and the spin rate on the golf ball. That really, really matters to your experience on the golf course.

40 YARDS

Especially to those with slower swing speeds or those with very, very fast swing speeds, the difference in tee shot improvement we can create, just by changing launch conditions, can be beyond 40 yards. That's not just a great feeling when you hit the ball further; that could mean an easier #8 iron second shot vs. a more difficult #5 iron. Who wouldn't want that?

Fix your millimeters and yards

Get every yard off the tee your potential deserves. Come and have a tee shot assessment, and let's see how we can add 20, 30, and even more yards to your tee shots.

What matters most to you?

One more **QUESTION**

We asked a question.

Do you see golf as a social, recreational activity OR a competitive sport?

That invites one more question about your hopes.

[Answer now >](#)

If you followed the link, you'd see that it's quite an interesting question. I've seen a summary of the priorities from six other clubs. It will be good to see how we line up.

Remember, you can remain as anonymous as you like. I would be interested to know who you are, but please don't enter your name if you don't feel comfortable doing so.

It's a fun question

If you skipped the link above, then please know that it's quite a thought-provoking question. It's a what's most important A1 – 2 – 3 question.
