Start the year off correctly

With a little help from your friends

At Rob Noel Golf Academy

When was the last time you had your lofts and lies checked?

Has your grip deteriorated?

Start the golf season off with a little equipment maintenance.

If you haven't had your lofts and lies checked, or grips changed within the past six months you could be making your game more difficult to enjoy.

If your clubs are three years and older, you could be missing out on the new technology benefits.

This game is hard enough - [come see us](#) and we can add more enjoyment immediately.

Time to test your skills

Operation 36 Tournament

February 15th from 3-5 pm.

Please [let Nic know](#) if you will be attending

Hard-working Elite Group

It takes time and effort...

What's in a shaft?

WHAT WOULD
YOU RATHER
HAVE?

A longer driver shaft that increases clubhead speed, but makes it more difficult to consistently square the face at impact?

OR

A shorter shaft that doesn't add extra clubhead speed, but makes it easier to square the face at impact?

Your decision could transform your tee shots for the better.

YOUR BALL FLIGHT HOLDS THE ANSWER

By assessing your ball flight, shot dispersion and distance we can help you make the right decision. The one that is going to give you the best distance and dispersion gains.

Let's find out together

The right length shaft for you can make it easier to hit consistent tee shots.

Let's find your ONE, so you can split more fairways.
