Unlock your dream

Of a more consistent and confident game
this season!

Golf practice and player development are going through a period of tremendous change, and technology is a central component in that transformation. With TrackMan, you have all those tools to jump ahead and get yourself a better game for the 2020 season.

As well as the TrackMan fitting experience, our **TrackMan Virtual Golf** allows you to play several courses we have loaded on the computer.

While the weather isn't great outside our Hitting Bay will help with warm-ups and practice.

If you would like to learn more, please

AVAILABLE
WEDNESDAY - SUNDAY
(9AM - 5PM)**

- WARM-UP PRIOR TO
YOUR ROUND
- GET LOOSE WITH THE
ORANGE WHIP
 - PRACTICE
 - CLUB FITTING
- TEST NEW EQUIPMENT
 - LESSONS
- TRACKMAN AVAILABLE

What's in a shaft?

**MORE SWING
CONSISTENCY**
IS IN YOUR HANDS

The shaft connects your hands to the clubhead. It's the way you transfer energy to the clubhead and the golf ball.

When it's fitted properly for you, your shaft can improve your swing tempo and balance. This helps that transfer of energy in a big way.

WHY WEIGHT MATTERS

Shaft weight has an impact on the total weight of your club, which affects your swing tempo and timing. This changes how consistently you can hit nearer the center of the club face. And doing that, is the best way to get further down the fairway.

Find your ONE

There are thousands of shaft combinations out there. By measuring your swing speeds with a variety of shafts, we'll find your ONE, so you can split more fairways.

For the fastest swings

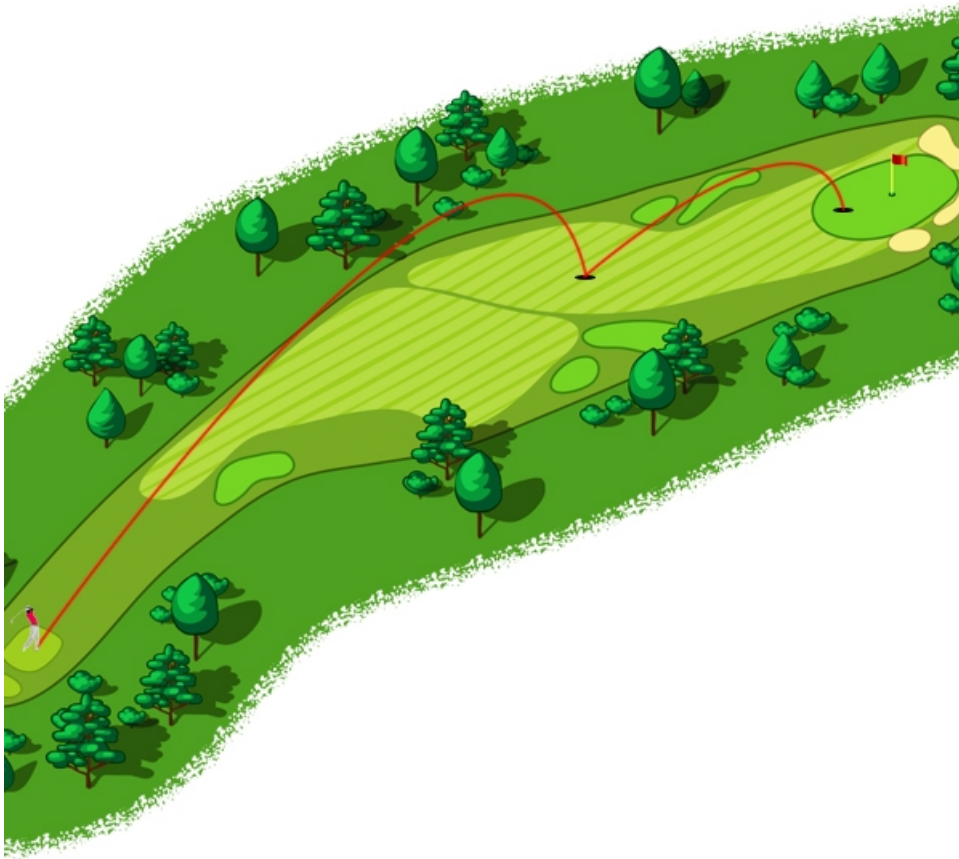

Those with the fastest swing speeds need less spin and a more penetrating trajectory. The **Callaway MAVRIK Sub Zero Driver** delivers that with a high MOI. That means more ball speed, better launch conditions, and more consistency.

Build your best game

Irons are your link between the tee and the green. So, getting comfortable and consistent with your whole iron set will transform your golfing experience and open up a world of scoring opportunities.

FALLING BACK WEAKENS THE LINK

A common iron swing issue we see is golfers not transferring their weight fully during the downswing, falling away from the target. This opens the chest up and makes squaring the club face very difficult. Struggling to hit your irons consistently? Let's have a look at your downswing.
